WRC Coordinator

Dear Ted

The Mile High Conservation District has reviewed the WRC's 319 grant application to the Montana Department of Natural Resources for the Browns Gulch watershed in Silver Bow County and feels the grant would be a great fit to all the work with natural resources the District has partnered in to date. The assessment work that has identified a number of source areas of sediment loading in the watershed and being able to address these areas is critical to increasing water quality and quantity to Silver Bow creek and in turn to the Clark Fork river. The District has been working on projects in the Browns Gulch watershed for many years and has helped fund a number of pilot projects to demonstrate best management practices and how such practices will in the long run pay for themselves. The grant application proposed supports the Mile Conservation Districts work plan to support area residents and producers to better use the natural resources provided to us by this great place we live Montana.

Please feel free to have the DNRC or your self contact the District with any question or concerns.

Sincerely:

John M Moodry  
Treasurer MHCD

Re: Letter of Support for the Browns Gulch Restoration Project

Dear Ted:

The Butte-Silver Bow Public Works Department supports the Watershed Restoration Coalition and the Mile High Conservation District in their efforts to secure a 319 Grant for Phase 1 of the Browns Gulch Restoration Project. The Butte-Silver Bow Public Works Department will cooperate in efforts in restoring and stabilizing the stream channel and banks of Browns Gulch Creek and Hail Columbia Creek to improve water quality, fisheries and stream channel stability.

The Butte-Silver Bow Public Works Department will provide in-kind match for labor and equipment for the Phase 1 of the Browns Gulch Restoration Project. If we can be of any further assistance, please call me at your convenience.

Sincerely,

Dan Dennehy, Director

RE: LETTER OF SUPPORT FOR BROWNS GULCH RESTORATION PROJECT

I am a landowner with property along Browns Gulch, in Silver Bow County. I am interested in supporting improvements to water quality, fisheries, and stream channel stability on Browns Gulch.

The Browns Gulch Restoration Project led by Watershed Restoration Coalition and the Mile Hi Conservation District is proposing stream bank, road, culvert and irrigation structure upgrades which will improve conditions on the creek. I will support those improvements by granting permission for access, coordinating with technicians on appropriate designs, and providing other support as appropriate within my means.

Thank you.
